## SUSTAINABLE AGRICULTURE: NEW PARADIGMS AND OLD PRACTICES? INCREASED PRODUCTION WITH MANAGEMENT OF ORGANIC INPUTS IN SENEGAL

AMADOU MAKHTAR DIOP

*The Rodale Institute, 611 Siegfriedale Road, Kutztown, PA 19530, USA  
(e-mail: [adiop@rodaleinst.org](mailto:adiop@rodaleinst.org); fax: +1 610 6838548)*

**Abstract.** Farmers in Sahelian countries are confronted with a variety of soil fertility and management problems. During the last two decades, NGOs have worked with farmers and research institutions to develop and test practices that will increase food production, while at the same time enhance the natural resource base.

Since 1987, The Rodale Institute (RI) has worked closely with farmers' associations and government institutions to promote regenerative agriculture-farming systems that prioritize the use of local resources while improving them as they are used to grow food, using agro-ecological methods. The Senegalese Agricultural Research Institute has collaborated in this program as a partner of RI. The Senegal Regenerative Agriculture Resource Center model has been applied as a new and viable approach that builds on traditional knowledge and farmer-to-farmer exchange.

Research results on soil conservation and improvement have shown that fields spread with amended animal manure or compost yield greater harvests than fields farmed with traditional methods.

K nalezení potřebného dokumentu můžeme využít také rozšířené vyhledávání dokumentů (odkaz „more option“ na úvodní obrazovce). V tomto typu vyhledávání je možné upřesnit vyhledávací kritéria (autora publikace, ISBN, datum publikování aj.).
